FELCO 600 PRUNING SAW

Rust resistant, hard-chromed blade made of high quality steel. The shape of the blade is thinner at the top and thicker at the bottom where the teeth are. This feature keeps only the teeth in contact with the material to be cut to prevent clogging and binding, since the sides of the blade never come in contact with the wood. Ergonomic comfortable non-slip handle. Cuts branches up to 4" diameter. Blade length: 6". Weight: 5.5 oz.

FELCO LOPPERS

Felco loppers cut branches up to 1-1/2" in diameter with ease. Because of its construction, a precise adjustment system and great cutting performance, these loppers have achieved top results compared with many on the market. Handles are made of forged light metal which guarantees light weight and no breakage. Felco 20: Blade length 17". Weight: 27 oz. Felco 21: Blade length 25". Weight: 40 oz.

195-3826F21P	Felco 21

FELCO 610 PRUNING SAW

Features of blade design are the same as on the FELCO 600. The blade cuts as smooth as if the wood was planed. Resins will not cling to the blade and green soft wood will not clog the teeth. Ergonomic comfortable non-slip handle. Cuts branches up to 9" diameter. Overall length 20". Blade length: 12 1/2". Weight 7.8 oz.

PRUNING SHEARS, LOPPERS & SAWS

FELCO 2

Solid forged metal handles are complemented by a Swiss precision made hardened cutting blade with a sap groove. A hardened bolt and nut assure exact adjustment of both the cutting and anvil blades. A rubber cushion and shock absorber provide smooth working and soft closing of the pruner.

Stock No.	Item
195-38221F2P	Felco 2

FELCO 4

A basic pruner without the refinements but still with the famous FELCO quality and cutting performance. This model offers the same quality cutting blade as the FELCO 2. The blade adjustment is by the center bolt and nut only. It has no rubber cushion, shock absorber or locking segment.

Stock No.	Item
195-38221F4P	Felco 4

FELCO 9

True left-handers version of Felco 8. Ergonomically designed pruner. Light alloy handles are shaped to act as an extension of forearm. The anvil blade is designed to prevent the pruner from sliding through the hand. Both the cutting and anvil blades are screw mounted, and the narrow, pointed blade design allows for close pruning.
