

# DEWITT SUNBELT WOVEN GROUND COVER

DeWitt Sunbelt Woven Ground Cover consists of 3.2 oz. polypropylene, which resists tearing, puncturing and weed penetration. It is approved for most government weed control applications. Sunbelt is ideal for greenhouses, outdoor displays and as a weed barrier for

plantings without topical coverings where a weed free environment is a must. DeWitt Sunbelt is striped every 12 inches to aid in plant alignment and is UV stabilized to last even in direct sunlight.

## MULCHES

SRM Black is used to suppress weed growth, reduce soil water loss, increase soil temperatures and improve vegetation yields.

SRM Red is the same as black, but enhances the growth & yields of several vegetable crops, including tomatoes, which benefit from light reflected off the red mulch.

SRM Silver, in addition to the benefits from plastic mulch, it also provides control over many flying insects that transmit serious viral diseases.

SRM Olive suppresses weed growth like black mulch, while warming the soil as much as clear plastic.

Planters Paper provides similar crop response to that of black plastic but is biodegradable after 8-10 weeks and cooler by 1° to 2°.

### GROWER TIPS:

- Most pesticides and fungicides perform more effectively when the pH of the tank mix is below 6.5 on the pH scale.
- Always check your chemical directions for optimum pH levels.

### GROWER TIPS:

#### Extraction to Measure pH & EC

- 1:2 Dilution Method
1. Mix 3 oz. of soil with 6 oz. of distilled water.
  2. Let mixture stand 15 to 20 minutes.
  3. Filter liquid into clean cup.

### GROWER TIPS:

#### What is pH?

pH is a measure of how acidic or basic a solution is. It is measured on a scale from 0 to 14, with 7 being neutral, 0 the most acidic and 14 the most basic (or alkaline).
